## About Us!

ORA Policy is much more than a just Gadget Protection Company

ORA Policy is the fastest growing Gadget Protection brand in India. Our product offering is a combination of function and growth yet at an affordable price.

**Since we opened our doors in 2013, technology has been evolving by the minute.**

Our business is helping our customers get the most value out of their purchases by making them last longer and work better.

From our phones to our homes, it seems like everything is getting smarter and more connected. Which is great, until it stops working. Then, we need help—and fast.

That's where ORA Policy comes in. Before us, Protection plans & extended warranties were living in the past. The only thing worse than the flimsy protection was the awful customer service. We knew it was time to create protection plans as innovative as the products we protect, and to treat our customers as we'd want to be treated.

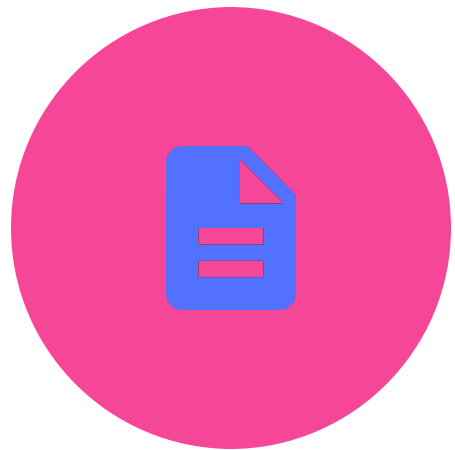

That's how we're changing our industry—and turning a bad service category into something good. Simply put, we're obsessed with customer service. Our everyday mission: help get people back up and running, quick and easy, with no hassles.
